DETAILED ACTION

This office action is in response to applicant's amendment filed February 1, 2005.

Allowable Subject Matter

Claims 2-4, 7-10, 12 and 27-38 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or make obvious applying a mask over a pad such that the mask has a noncircular opening with a first and second dimension, wherein the mask does not cover the pad in the first dimension and partially covers the pad in the second direction, and the first dimension is oriented in the direction of highest stress for each interconnection.

While it is known in the art that there is a relationship between pad size/ shape and orientation/direction to accommodate stress as shown for example in Barrow (U.S. 6,118,182) and Kim (U.S. 6,268,568), the prior art fails to show or make obvious orientating mask openings in relation to stress in a direction of highest stress for each interconnection.
